

THE ELVEX® 2013 NEW PRODUCTS PORTFOLIO

There's plenty new at ELVEX®

There are plenty of things that are new at ELVEX®. New Management — New Focus — New Strategy. A new commitment to innovation and leadership.

And, along with all that, we have exciting new products to offer in 2013 that begin to demonstrate our new approach to quality products that provide real solutions in meeting a myriad of safety needs.

Go-Specs™/ Go-Specs II™

The most comfortable snug fitting spectacles for dirty & windy environments

We've made several new additions to our exciting Go-Specs™ line, which gives you the comfort of a spectacle with goggle-like protection. The vented EVA closed cell foam seal on the Go-Specs™ protects from airborne particles like dust, sand, cement and chemicals in dusty and dirty environments, with greater field of vision and comfort — and fitting more head geometries — than any product on the market today.

In our original Go-Specs™ line we have added an Amber lens option with SuperCoat™ Anti-Fog protection and a Strap option in Clear and Grey SuperCoat™ Anti-Fog lenses.

And in our Go-Specs II™ ballistic line we have added several new products:

- Go-Specs II™ in Amber SuperCoat™ Anti-Fog lens
- Go-Specs II™ in Weld Shade 3 SuperCoat™ Anti-Fog lens
- Go-Specs II™ in Weld Shade 5 SuperCoat™ Anti-Fog lens
- Go-Specs II™ in Desert CAMO frames available in Clear, Amber and Grey SuperCoat™ Anti-Fog lenses

COMING SOON IN 2013:

Two new Go-Specs™ products with strap options in Clear and Grey SuperCoat™ Anti-Fog lenses

GG-40A-AF

GG-41C-AF

GG-45A-AF

Choose frame or strap option

GG-45WS3-AF

GG-45C-AF-DCAMO

Brow-Specs™

Increased protection from falling particles

Brow-Specs™ feature a vented EVA closed cell foam seal along the brow line, providing maximum comfort and increased protection from impact and debris — all in a sleek, wrap-around design that offers ballistic protection with uncompromised field of vision.

We've added four new products to the Brow-Specs™ line:

Cobalt SuperCoat™ Anti-Fog lens
Weld Shade 3 SuperCoat™ Anti-Fog lens
Weld Shade 5 SuperCoat™ Anti-Fog lens
Prescription insert frame
(prescription lenses not included)

See page 10 in the 2012 ELVEX product catalog.

Reflect-Specs™

Visibly improving safety

A new safety innovation from ELVEX! Designed for people working in dusk, night-time and low-light conditions, the unique patented reflective frames make identification of workers easier in low-light conditions — and the workplace safer!

Available NEW in 2013:

Clear lens, Hi-Viz Yellow Temples with Silver reflective panels
Clear Anti-Fog lens, Hi-Viz Orange Temples with Silver reflective panels
Amber lens, Hi-Viz Yellow Temples with Silver reflective panels
Indoor/Outdoor lens, Hi-Viz Yellow Temples with Silver reflective panels

SG-53-I/O

Sphere-X Ultimate™

A Classic Safety Style with “Ultimate” looks and performance

We have created a new, exciting line called the Sphere-X Ultimate™. It takes all of the core safety of the Sphere-X™ line into the next generation with V0 ballistic rating for great impact protection and a sleeker, lighter-weight design. The Sphere-X Ultimate™ still offers adjustable drop temples for greater comfort and non-slip stability, but we have added frame ventilation for reduced fogging to our extended wrap-around lenses.

The new Sphere-X Ultimate™ in 2013 comes in:

Amber, Clear and Grey lenses
Clear and Grey SuperCoat™ Anti-Fog lenses
Indoor/Outdoor lens
Silver Mirror lens
An innovative Copper Blue Blocker lens

SG-51-I/O

SG-51BB

Avion™/Avion SF™

Our Flagship for Unitary Lens style, comfort and ballistic protection

One of our most popular safety glass is getting exciting new additions. Avion™ now comes in both regular and new SF (Slim Fit) models allowing better comfort, fit and protection for a broader range of facial shape sizes and applications.

Avion™ additions in 2013:

Avion Clear lens with black temple tips

Avion Grey SuperCoat™ Anti-Fog lens with black temple tips

Avion SF - Clear lens with black temples and tips

Avion SF - Clear lens with pink nose bridge, temples and tips

Avion SF - Clear lens with blue temples and tips

Avion SF - Clear SuperCoat™ Anti-Fog lens with black temples and tips

Avion SF - Grey SuperCoat™ Anti-Fog lens with black temples and tips

Acer™

Classic style with an exciting CAMO look

Who said safety eyewear cannot also be classically stylish? Our Acer line of glasses features a full coverage floating lens design, making it a highly functional, great-looking safety glass. Now we have added an exciting CAMO frame that is available in Clear, Amber, Indoor/Outdoor and Gray ballistic rated lenses.

See page 10 in the 2012 ELVEX product catalog.

SG-12A-CAMO

OVR-Specs II™

Designed to stylishly fit over today's most popular prescription frames

Our OVR-Specs II™ is perfectly sized and balanced to comfortably fit over today's more popular small to mid-sized prescription glasses. OVR-Specs II™ are now available in exciting Amber lenses for an even wider array of uses in lower light conditions and quality control applications.

See page 11 in the 2012 ELVEX product catalog.

SG-37A

RX-400™

More bifocal magnifiers covering more applications

ELVEX was the first PPE Company to introduce Polycarbonate (PC) bifocals to the safety eyewear market. And our industry leading line of bifocal safety glasses just got even bigger! The RX-400, our stylish economical bifocal eyewear, is now available in an Amber lens in +1.0, +1.5, +2.0, +2.5 and +3.0 bifocal strengths.

See pages 5 and 6 in the 2012 ELVEX product catalog.

RX-400A-1.0

XTS™

Where sleek sporty style and ballistic protection meet

Our stylish, contemporary XTS™ lens provides a sleek sunglass style for better coverage and fit. And in 2013 we will be adding black glossy frame with a mirror lens to the XTS™ line to give even more stylish options in safety glasses.

See page 9 in the 2012 ELVEX product catalog.

SG-24M-BLK

Sonoma™

Contemporary and timeless upscale style

Our sporty Sonoma™ safety glass line will be adding two new, very stylish options: a classic glossy gunmetal grey frame is now available in Clear and Grey lens, and Grey Polarized lens.

See page 14 in the 2012 ELVEX product catalog.

Guide™ System

Economical, short range communications in noisy environments

The perfect solution for communications in loud environments, the Guide™ System attenuates environmental noise and allows you to transmit and receive clear voice communications to groups of up to eight in a range of up to 75 feet! This is perfect for guided tours in noisy plants, plant troubleshooting and for workers that must communicate in a noisy environment.

See page 39 in the 2012 ELVEX product catalog.

COM-691

COM-690

COM-699

ProVest™

Chest and shoulder protection with convenient Productivity Pockets

In 2012 we have redefined our ProVest™ product line to add Polara protection in the upper chest and shoulder area to protect the sawyer against dangerous chain saw kickbacks and adding pockets for improved functionality. Breathable outer fabric, mesh back panel, and open sides make the ProVest™ ideal for hot, humid conditions. Available in all sizes (except small), the newly re-designed ProVest™ has expandable side sizing adjustments and is a significant improvement on an already industry-leading product.

JE-70L

Pro-Gloves™

Specifically designed for safe chain saw handling

Pro-Gloves™ provide the sawyer with a critical layer of protection on the back of the left-hand glove — and offers a level of comfort to match the protection! Velcro closures tighten the fit, and keeps your gloves secure and chips out. In 2013 we are adding a small size glove to complete the line.

See page 47 in the 2012 ELVEX product catalog.

JEGLV-50-SML

ProChaps™

Patented Asymmetrical Design in more styles and sizes

The industry's best-protecting chain saw chaps line will get a little longer in 2013 — and that's good news for larger sawyers. We will be adding 43-inch lengths to the line in both the regular and Calf Protection ProChaps™ models, where the patented asymmetrical design provides extended protection in the areas it is needed most.

See page 45 in the 2012 ELVEX product catalog.

JE-9043

Wedge Pouch™

A place to hold your tools

A completely new addition to the industry-leading ELVEX chain saw protection line: an innovative wedge pouch that has been designed to attach to the sawyer's belt. There's ample room for two large wedges, one small wedge, a wrench and a chain saw file — all safely within reach of the sawyer in the field.

JE-WP

Arc Flash Kits

Extending ELVEX's leading Cap/Visor system

Protection against extreme heat — up to temperatures that exceed 35,000°F — has been strengthened with the release of four new ARC Shield kits that include: Arc shield, Hard hat, Visor bracket, Slot adaptor, Balaclava and Cap Mount ear muffs or Quattro ear plugs. These kits are suitable for Hazard/Risk Categories (HRC) 1 and 2. Our shields have been designed with light green polycarbonate material to provide excellent visible light transmission (VLT).

See page 23 in the 2012 ELVEX product catalog.

CU-ARC-3

HD-ARC-FR3

Protective Headgear Bag

Protect your PPE equipment

Our face shields protect workers in all sorts of hazardous and dirty work environments. But what about the other way around? Our large microfiber bag is built to fit our large shields assembled on hard hats, so your equipment can be protected for when you need it most.

SGB-100

Acetate Face Shields

Our new acetate shield is an economy chemical splash protector with a 15.5" surface area. Offering protection at great value. (Flat)
